

E-Business and E-Commerce

Program: BIT

Type: Theory + Lab

Year:3/4

Semester:

Credit Hour: 3 (2TH + 1PR)

Contact Hours: 45

Course Objectives:

- Provide students with an understanding of e-business and e-commerce
- Teach technologies and strategies necessary to conduct business online
- Emphasize importance of e-business and e-commerce in today's digital economy
- Introduce key concepts, tools, and techniques essential for success in the field
- Prepare students for the rapidly evolving nature of e-business and e-commerce

Course Description:

This course is designed to introduce students to the world of e-business and e-commerce. Through lectures, discussions, and hands-on exercises, students will learn about the various technologies and strategies that are necessary to conduct business online, including web design and development, online marketing, social media, mobile apps, e-payment systems, security and privacy, and customer relationship management. The course will also explore the various business models that are used in e-commerce, and the challenges and opportunities that are inherent in conducting business online.

Course Outcomes:

Upon completion of this course, students will be able to:

- Understand the fundamental concepts and principles of e-business and e-commerce.
- Analyze and evaluate e-business and e-commerce business models.
- Design and develop a simple e-commerce website using relevant technologies and tools.
- Apply effective online marketing techniques to promote e-commerce businesses.
- Understand the key security and privacy issues associated with e-commerce.
- Analyze and evaluate the impact of social media on e-commerce businesses.
- Identify and apply effective customer relationship management strategies in e-commerce businesses.
